TRCI FEBRUARY-2010 RESULTS ANNOUNCED ...

A. TRCI gives recovery signals: TRCI January-2010 improved by *15.5 points* compared to February 2009. Nonetheless, the index still moves at the negative zone.

Figure-1. TRCI (% increase -% decrease)

Table-1: TRCI (%)

	January	February	March	April	May	June	July	August	September	October	November	December
2008					-19.6	-23.8	-20.6	-7.8	-9.4	-20.7	-27.2	-30.8
2009	-29.5	-26.0	-17.1	-9.8	-10.1	-8.8	-6.8	-5.1	-4.9	-10.3	-9.9	-19.2
2010	-17.5											

B. 11.8 percent of survey participants in February 2010 claim their business activity increased compared to February 2009 while 64.9 percent of the participants believe that their business activities deteriorated from February 2009 to February 2010.

Figure-2: How has your business activity developed this year compared to the same period in the last year? (%increased- %decreased)

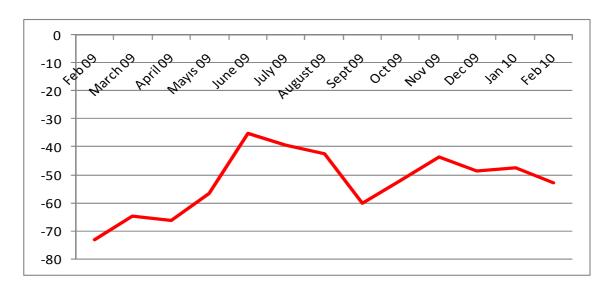

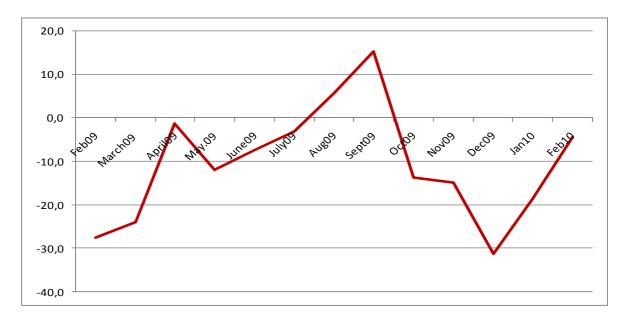

Table-2. How has your business activity developed this year compared to the same period in the last year? (%increased- %decreased)

%	January	February	March	April	May	June	July	August	September	October	November	December
2008					-60.1	-60.7	-61.5	-47.6	-55.5	-57.1	-62.7	-68.1
2009	-73.4	-73.2	-64.6	-66.4	-56.8	-35.3	-39.6	-42.5	-60.1	-52.1	-43.6	-48.8
2010	-47.7	-53.1										

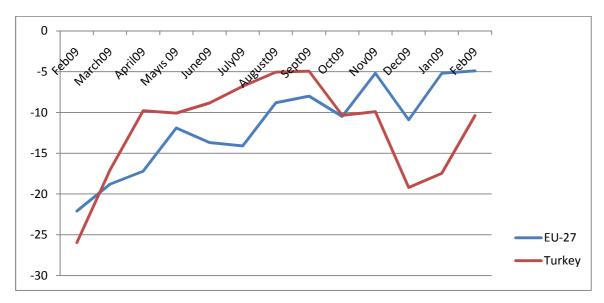

C. The recovery appears more significant in prospective expectations. In February 2010, 30.4 percent of survey participants expect an increase in their business activities over the next three months while 23.1 percent expect a deterioration in their business activities over the same period.

Figure-3. TRCI – Expectations for business activities over the next three months (% increase - % decrease)

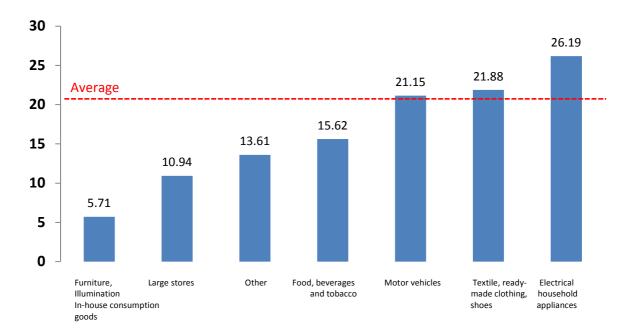

D. In February 2010, TRCI converged to the EU average. Over the last months TRCI varied significantly below the average retail confidence index in EU countries. However, with the recovery witnessed in February 2010, TRCI converged to the EU average.

Figure-4. Comparison of TEPE and EU-27 Retail Index (February -2009, February -2010)

E. In February 2010, the improvement in TRCI values compared to the same month in the year before was above the average in electrical household appliances, ready-made clothing, and motor vehicles sectors and below the average in Furniture-illumination sectors and large stores.

Figure-5. Change in TRCI in February-2010 compared to the same period in the last year (points)

F. A comprehensive analysis of TRCI questions reveals that expectations for the coming period signal a significant positive trend along with the impact of seasonality factor. Nonetheless, it is yet an important problem that these expectations were not translated in employment prospects. That following the price increases in January, prices fell back onto the previous course pushes down inflation expectations for February.

Table 3. Detailed TRCI results by questions (%)

Questions ¹	Index 02/2009	Index 01/2010	Index 02/2010	Change compared to the month before 02/2010	Change compared to the same month in the last year 02/2010
How has your business activity developed over the past three months? It has	-74.2	-58.4	-54.7	2.8	18.6
